

Task 2 Data visualisation report and creative artefact ↕

Goal

Design and develop effective data visualisation for a real-world data case study.

Format/product	Artefact — Creative and written piece
Type	Individual
Weighting	50%
Word count / length	1500-word report (+/- 10%) and data visualisation artefact The word count does not include the reference list.
Course learning outcomes (CLOs) assessed in this task	2, 3, 4
Due date	Friday of Week 10, at 9 am (AEST)

□ AI-Supported Learning Statement

This task permits the responsible and ethical use of artificial intelligence (AI) tools to support your learning and completion of some aspects of this task.

The work you submit for this task must remain your own.

This means:

- The ideas, arguments, and final responses you submit must be your own work.
- Your submission must reflect your understanding, voice and learning.
- You are responsible for checking the accuracy, relevance, and ethics of any AI-assisted content you use.
- You must acknowledge the use of AI in your submission.

Please refer to the [Artificial Intelligence for Students Guide](https://libguides.usc.edu.au/ai-students) (<https://libguides.usc.edu.au/ai-students>) for guidance on how to use AI responsibly and how to [acknowledge your use of AI](https://libguides.usc.edu.au/ai-studentguide/responsible#s-lg-box-23112449) (<https://libguides.usc.edu.au/ai-studentguide/responsible#s-lg-box-23112449>).

While you may use AI as outlined in the assessment instructions, you must ensure that the authorship of the work remains your own. Do not hand over (transfer) or give up (relinquish) authorship, and do not falsify or fabricate any content or supporting documents.

NOTE: For this task, the **use of generative artificial intelligence (AI) is regulated to brainstorming and generating ideas in the preparation of this assessment**. Additionally, you may use AI tools to refine or edit your final submission. In this case you may be required to provide a copy of your assessment with no AI editing, as an appendix of the final submission. Please note that while the limited use of AI tools is permitted in this task, their use will not be beneficial. **If you choose to use AI you must acknowledge it.**

Assignment is eligible for 48-hour automatic assignment extension request

- You may request a one-off 48-hour automatic extension through EzExtend without providing documentation or justification.
- Any extension beyond this period must be requested via the standard extension or special consideration process and will require supporting evidence.

Assessment criteria

This assessment will measure your ability to:

1. analyse a case study and develop a statement of purpose/objective for a data dashboard
2. create a data dashboard integrating a variety of insights from the source data
3. understand and use data visualisation principles and approaches
4. communicate the potential of data insights and their usefulness
5. effectively organise, present and discuss data visualisations in a professional report.

See the submission space for a detailed marking rubric.

Task instructions

This task requires you to design and develop an effective data visualisation for a real-world data case study. Using data visualisation software (MS Excel), you should create a dashboard to communicate insights for the given target audience. In addition, you are also required to submit a report.

To complete this task, you will need to do the following.

1. Develop a statement that introduces the purpose/objective of your dashboard. It will need to explain what the dashboard will do to support decision making. (approx. 200 words)
2. Create a dashboard using Excel. Your dashboard should include a title, and you must make use of appropriate theories and principles to create at least six different visualisations that will be useful to the target audience in their strategic decision making. You will be assessed on your creativity and use of concepts taught during the course.
3. Provide a statement that details how you have used theories and principles to develop appropriate visualisations. Your statement should take into consideration all stages from preparation to end product. (approx. 400 words)
4. Provide a statement detailing the information that can be obtained through the use of your dashboard and how this will help the target audience to achieve their objectives. Recommendations should be provided. (approx. 400 words)

□ Tips for success

This task will take many weeks to complete and will require a good understanding of data visualisation theory and practice for successful completion. It is imperative that you take heed of the following points.

1. Ensure that you clearly understand the requirements for the task — what must be done and what are the deliverables?
2. If you do not understand any of the task requirements, please ask the course coordinator or your tutor.
3. Each time you work on any aspect of the task, reread the task requirements to ensure you clearly understand what is required.

For all parts of the report, we do not advise you to use AI for anything other than a superficial thought generator.

□ Resources

Please download the following file, which forms the foundation of your response.

- [Task Information sheet \(https://learn.usc.edu.au/courses/35242/files/3296036?wrap=1\)](https://learn.usc.edu.au/courses/35242/files/3296036?wrap=1)

Please refer to Chapter 3 of the *Communication skills handbook* ([Summers & Smith, 2014 \(https://learn.usc.edu.au/courses/35242/files/3168718?wrap=1\)](https://learn.usc.edu.au/courses/35242/files/3168718?wrap=1)) to better understand the requirements for your report. This text can be accessed as an eBook through the UniSC Library.

Referencing guidelines

Please use APA 7th edition as your referencing style. For more information, see the [Referencing Guides and Academic Integrity page \(https://www.usc.edu.au/current-students/student-support/academic-and-study-support/referencing-guides-and-academic-integrity/apa\)](https://www.usc.edu.au/current-students/student-support/academic-and-study-support/referencing-guides-and-academic-integrity/apa).

The reference list is not included in the word count. In-text citations are included in the word count.

Submission format

There are two deliverables for this task:

1. an **Excel file** containing your data dashboard
2. a 1500-word report submitted as a **Microsoft Word document**.

The submission space is currently available.

In keeping with University of the Sunshine Coast policy, all assignments are to be submitted in Canvas via Turnitin.

To be accepted, your assessment submission *must* generate a similarity score (you are responsible for checking this). Submitting in Word is the best way to do this. If your submission does not generate a similarity score, it cannot be checked for plagiarism and therefore *will not be marked*.
