

Task 3 (<https://learn.usc.edu.au/courses/35242/pages/task-3-examination>) is the assured learning assessment for this course. This means that the exams must be held in an invigilated environment and students must have their identity validated prior to the start of the exam.

Therefore, you are required to **attend the Week 12 workshop in which you enrolled** at the regular start time. **It is essential that you attend your class on time** as there are administration tasks to complete prior to the start of the exam. Please have your Student ID card or other verifiable photographic ID with you. You will need to show this prior to the exam to confirm your identity. Your Task 3 exam will start 15 minutes after the start of the workshop.

Supervision of **online students** will be facilitated through the regular Zoom workshop session. Online students must remain on camera for the duration of the whole exam. It is strongly suggested that you use your phone to access Zoom as you will need to position your camera to show yourself and the environment in which you are undertaking the exam.

The following exam conditions apply:

- The exam will be accessible through the **Assignments tab on Canvas**.
- Students are **allowed paper-based notes** which may be typed or handwritten.
- Students are **not allowed access to digital resources** in any format. Therefore, phones must be left in bags/at front of room/facedown away from all students.
- Students are **not allowed** to use generative AI.
- **Students should not copy and paste answers from any source. A mark of zero will be given for answers where there is evidence of copy/paste activity.**
- Students will have 90 minutes to answer 5 short essay or file upload type questions. Questions vary in the number of marks available. Therefore, it is important to consider an appropriate strategy before the exam and plan your time accordingly.
- **Students will not be able to navigate backwards to previous questions.** Therefore, you must fully answer each question, as it becomes available, before you move on to the next. This includes uploading the completed answer file when required. Remember it is your responsibility to provide an answer.
- Questions are randomised and drawn from question pools; therefore, students will get different questions.
- The exam will auto-submit at the end of 90 minutes.

Remember, this exam may include anything from Module 2 to Module 10 (inclusive). The best form of revision is to undertake all the questions on the workshop activity sheets and understand how to complete them. Please also make sure that you review relevant examples, concepts, calculations and processes covered throughout the modules.

Good luck,
Judy
