

Task 3 Examination

Goal

Assess your understanding and application of visualisation techniques to make sense of business data.

Format/product	Examination
Type	Individual
Weighting	40%
Word count/length	2 hours (includes administration time)
Course learning outcomes (CLOs) assessed in this task	1, 2, 3
Due date	Week 12 - you must attend the tutorial in which you are registered

- Your tutor will advise you the specific day and time.

Assured Learning Statement

This task is an assured learning assessment. It has specific requirements for verifying your authorship of the work and the conditions under which you completed the task.

This means:

- You must ensure that the authorship of the work remains your own.
- You must not hand over (transfer) or give up (relinquish) authorship.
- You must not falsify or fabricate any content or supporting documents.
- You must only use artificial intelligence (AI) where the Course Coordinator has specified in the task instructions, demonstrating relevant professional or disciplinary learning.
- If instructed to use artificial intelligence, you must follow the assessment instructions provided.

Any departure from the above requirements may lead to the misrepresentation of your achievement of the stated learning outcomes. If your authorship cannot be verified, penalties outlined in the [Student Misconduct Procedures \(https://www.unisc.edu.au/about/policies-and-procedures/student-misconduct-procedures\)](https://www.unisc.edu.au/about/policies-and-procedures/student-misconduct-procedures) (Section 5) may apply.

Assignment is **not** eligible for 48-hour automatic assignment extension request

- Due to the nature of this assessment task, the due date is fixed.
- Any request for an extension must be submitted via the standard extension or special consideration process, and provision of appropriate supporting documentation is required.
- For all centrally scheduled examinations, you must apply for a deferred examination: [Deferred Examinations – Procedure \(https://www.unisc.edu.au/about/policies-and-procedures/deferred-examinations-procedures\)](https://www.unisc.edu.au/about/policies-and-procedures/deferred-examinations-procedures).

Assessment criteria

This assessment will measure your ability to:

- critically analyse data visualisation in the given problem
- demonstrate creative approaches to solving the problem
- apply relevant visualisation concepts.

As this task is scored each criteria is considered inherent within each point awarded.

Task instructions

You will be required to answer a set of questions about data visualisation. The exam will focus on all learning and workshop materials from Week 2 to Week 11 inclusive. Please note, content from the Microsoft Power Platform Fundamentals materials is NOT included in this exam.

The assessment is an individual Canvas exam.

The only materials required for you to undertake the Canvas exam are a computer with a reliable Internet connection. Reading time is not formally allocated for the Canvas exam therefore you are encouraged to consider your approach to the exam before you start. The total time that has been allocated for the Canvas exam provides sufficient time for you to do this.

Whilst 2 hours is allocated for this assessment task, the time includes administration time prior to the start of the exam (and after the exam, if required). You will have 1.5 hours to access, complete and submit the exam.

Note: During the Canvas exam there will be no opportunity to return to previous questions therefore please answer each question before moving on to the next.

Make sure you **answer all the questions**. Please type your answer in the text-box provided. Marks per question vary.

Randomisation is used so students will get different questions.

Please ensure you do your own work. Normal academic integrity rules apply.

By undertaking and submitting the Canvas exam students declare that they have not engaged in academic misconduct. Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion, outsourcing or distribution of any part of the Canvas exam to any other person. **You may not cut and paste material from any source.**

Note: You will receive a mark of zero for any answer that you copy and paste from another source.

Please make sure that you take screenshots of any technical issue, ensure that the date and time are visible in the screenshot.

□ Tips for success

- Try to complete all the questions.
- Use your own words when forming your responses to avoid plagiarism concerns.
- Take screenshots of any technical issue, ensuring that the date and time are visible in the screenshot.

Referencing guidelines

Please use APA 7th edition as your referencing style. For more information, see the [Referencing Guides and Academic Integrity page \(https://www.usc.edu.au/current-students/student-support/academic-and-study-support/referencing-guides-and-academic-integrity/apa\)](https://www.usc.edu.au/current-students/student-support/academic-and-study-support/referencing-guides-and-academic-integrity/apa).

Submission format

Canvas exam.

The submission space will be available to students for the duration of the exam only.
